profile.jpg

Professional Profile

Results-driven Software Engineer with a passion for building intelligent, modern, and highly-responsive applications. Experienced in professional Full-Stack Development from an internship at Wrapify Solutions. Formally trained in Machine Learning and Deep Learning with a complete 3-month NAVTTC certificate and strong commands of fundamental concepts. Proven ability to deliver production-ready full-stack AI-integrated projects and eCommerce platforms. Eager to apply unique combined expertise in AI and modern web technologies to innovative projects.

Work Experience

Full Stack Development Intern

Nov 2025 – Jan 2026

Wrapify Solutions | 3 Months

- Contributed to the end-to-end development of multiple full-stack web applications during a professional 3-month internship.
- Implemented responsive front-end user interfaces and developed robust back-end server logic.
- Gained practical experience with modern development workflows, version control, and collaborative project management.

Education

Bachelor of Science in Computer Science

2024 – 2028

University of Engineering & Technology (UET), Peshawar

CGPA: 3.45 / 4.0

FSc (Pre-Engineering)

Completed

Superior Lalazar Public School and College, Thana

Secured 1014/1200 marks

Matriculation (10th Grade)

Completed

Superior Lalazar Public School and College, Thana

Secured 963/1100 marks

Certifications

Machine Learning & Deep Learning Course

Completed

NAVTTC | 3 Months

Developed a strong, fundamental command of Deep Learning concepts and applied them to various predictive and analytical projects.

Technical Skills

Languages: JavaScript, Python, Java, C++, HTML/CSS

Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS, Vite, Astro, Material UI, MERN stack, OpenAI API, NumPy, Pandas, TensorFlow/PyTorch

Tools & Platforms: Git/GitHub, WordPress/WooCommerce, Vercel, Appwrite Authentication

Specializations: Full-Stack Web Development, Headless eCommerce, Machine Learning, Deep Learning, Front-End Design

Selected Projects

Quick-Blogs (AI-Powered Blog Platform)

[View Project](#)

Developed a secure, AI-powered Full-Stack Blog Platform featuring a secure backend, admin-controlled content publishing, AI-assisted content creation, and safe file uploads.

RealNova (Movie Web App)

[View Project](#)

Built a modern movie discovery web app using React and Tailwind CSS. Features real-time search, user favorites, Appwrite authentication, and analytics tracking.

Triostepdkhyber (Headless eCommerce)

[View Project](#)

Collaborated to design and develop a production-ready headless eCommerce website for Chelsea Shoes, featuring a highly performant frontend in Astro and a dynamic backend in WordPress.

AI Student Assistant

[View Project](#)

Engineered a Full-Stack MERN AI Student Assistant with intelligent Q&A, image-based problem solving, voice input, and personalized study dashboards using the OpenAI API.

Laptop Price Predictor

[View Project](#)

A Machine Learning project focused on analyzing specifications and predicting laptop prices based on technical features.

Deep Learning Tasks

[View Project](#)

A comprehensive repository demonstrating strong commands in various deep learning model implementation tasks and neural network architectures.

Doctor Appointment Website

Developed a responsive doctor appointment website using React.js and Material UI, featuring smooth navigation and interactive UI for scheduling and provider browsing.

Malakand News Website

Created a dynamic news layout with category sections and detailed article pages using React.js and Material UI, optimizing component structure for performance.
