

Hashir Ahmad

Software Engineer — Full-Stack & AI/Deep Learning Developer

Peshawar, Pakistan | 0370-5105561 | hashirahmad809@gmail.com
linkedin.com/in/hashir-ahmad-25639031b | github.com/hashirahmad806 | Portfolio

Professional Summary

Software Engineer specializing in full-stack web development and applied deep learning, with hands-on experience shipping production-ready, AI-integrated applications. Combines formal training in machine learning (NAVTTTC) with seven completed enterprise-grade certifications spanning computer vision, cybersecurity, cloud AI, and data analysis. Seeking to bring a dual full-stack/AI skill set to an enterprise engineering team where scalable architecture and continuous learning are valued.

Education

Bachelor of Science in Computer Science

2024 – 2028

University of Engineering & Technology (UET), Peshawar — CGPA: 3.45 / 4.0

Certifications

- **Machine Learning & Deep Learning Certification** — NAVTTTC (3-month program)
- **Computer Vision and Image Processing Essentials (V2)** — IBM, via Coursera (Jul 2026)
- **Microsoft Certified: Azure AI Fundamentals** — Microsoft (Jun 2026)
- **AI Fundamentals** — Google, via Coursera (Jul 2026)
- **Human Factors in AI** — Duke University, via Coursera (May 2026)
- **Managing Data Analysis** — Johns Hopkins University, via Coursera (Jul 2026)
- **Introduction to Cybersecurity Essentials** — IBM, via Coursera (May 2026)
- **Frontend Development using React** — Board Infinity, via Coursera (May 2026)

Experience

Full Stack Development Intern — Wrapify Solutions

Nov 2025 – Jan 2026

- Engineered responsive, component-based user interfaces and server-side logic for full-stack web applications, contributing to code that shipped to production across the internship term.
- Collaborated within an existing engineering codebase, applying clean-code and modular design practices to integrate new features without disrupting existing functionality.
- Partnered with senior engineers to debug and refine application logic, strengthening reliability of client-facing features

Projects

Quick-Blogs — AI-Powered Blogging Platform

- Architected a full-stack blogging platform with a secure authenticated backend and admin control panel, enabling content moderation and role-based access.
- Integrated AI-powered content generation into the publishing workflow, reducing the manual effort required to draft new posts ([ADD METRIC: e.g., % reduction in drafting time]).

RealNova — Movie Discovery Application

- Built a responsive movie discovery app using React and Tailwind CSS, implementing real-time search to surface results as users type.
- Implemented secure user authentication via Appwrite, enabling personalized watchlists and session persistence across devices.

Triostepdkhyber — Headless eCommerce Platform

- Deployed a production-ready headless eCommerce storefront for a footwear brand, decoupling an Astro frontend from a WordPress/WooCommerce backend for improved performance and flexibility.
- Optimized page delivery through the headless architecture, targeting faster load times than a traditional monolithic WordPress theme ([ADD METRIC: e.g., page load time in seconds/ms]).

AI Student Assistant — MERN Stack Platform

- Developed a MERN-stack intelligent assistant supporting natural-language Q&A, image-based problem solving, and voice input via the OpenAI API.
- Designed a multi-modal input pipeline (text, image, and voice) to broaden accessibility for students with different interaction preferences.

ML & Deep Learning Portfolio

- Trained and evaluated a Laptop Price Predictor regression model, applying feature engineering and model tuning to improve prediction accuracy.
- Implemented multiple deep learning model architectures using TensorFlow/PyTorch as part of a broader applied machine learning portfolio.

Technical Skills

- **Languages:** JavaScript, Python, Java, C++, HTML/CSS
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Tailwind CSS, Vite, Astro, Material UI, MERN Stack
- **AI/ML:** TensorFlow, PyTorch, OpenAI API, Deep Learning, Computer Vision
- **Cloud & Platforms:** Microsoft Azure AI, IBM Cloud/Watson (via certifications)
- **Tools:** Git/GitHub, WordPress, Vercel, Appwrite
